

Protect our clean air

Choose Sustainable Palm Oil!

Stop the haze

Forests are cleared and burnt for palm oil plantations. This is one of the main causes of the haze.

Haze-free palm oil is produced with NO burning, NO deforestation, NO peat drainage, and NO exploitation.

In Singapore, cooking oil labelled “vegetable oil” almost always contains palm oil.

Check the ingredients for “palm olein”.

Palm oil certified by RSPO, Roundtable on Sustainable Palm Oil, is the closest to haze-free

PMHAZE

a People's Movement to Stop Haze

Let's #GoHazeFree!

Contact local suppliers for
RSPO-certified cooking oil

| Company | Contact | email | Phone | Healthier choice option |
